

Seed Valley

GLOBAL CENTRE OF PLANT BREEDING AND SEED TECHNOLOGY

Seed Valley is the international centre of plant breeding and seed technology. More than 40 innovative companies develop high-quality vegetable- and flower varieties and new technologies for the horticulture sector. From the Seed Valley region, seeds and associated technology are exported to customers worldwide.

Specialists develop new vegetable- and flower varieties with higher yields, resistance against diseases and optimal growth under specific climate conditions.

High-quality seeds for growers – anywhere in the world – are crucial for sufficient and healthy food. The companies in Seed Valley contribute to the worldwide availability of healthy food and colourful flowers.

BREEDING IS SOMETHING YOU DO FOR A GLOBAL MARKET

Within the market for horticultural seeds, 'Holland' is an enduring trademark
