

Iribov is a leading laboratory providing services in the field of plant propagation and breeding. The main activities are tissue culture propagation of plants and various analyses of plants. Iribov has extensive expertise in more than 500 crops in floriculture, fruit, and vegetable crops. Iribov has a strong international market position as an independent supplier. With laboratories in the Netherlands, Macedonia, and Ghana, Iribov is an international organization with a total of over 500 employees. At least 50 million tissue culture plants are produced annually.

Are you looking for a challenging job at an international organization that is in full development? For the location in Heerhugowaard we are looking for a full-time (40 hours)

## Researcher Plant biology under Vertical Farm conditions

### Job description

Iribov has a vertical Farming facility consisting of numerous growth rooms. Next to the primary application of hardening plants more and more research is directed towards plant morphology and physiology, and the influence on specific plant growth features. Next to this, research on preparation of donor plants, for example for double haploid (DH) induction, is becoming more and more important. For the research program, set-up, follow through and expansion of this research, for both internal as well as external customers, this position is formulated. Do you have a drive for innovation and for Vertical Farming? We offer a hands-on research position within the research team. The job is open to Dutch and EU-talent that is willing to relocate to the Netherlands.

### What will you be doing?

Your job as a hands-on researcher involves the following tasks and responsibilities.

Managing the vertical farm research units including responsibilities on both growing and operation aspect.

Leading experiments and small-scale observations in the commercial plots and test rooms, in collaboration with both the research team as well as the greenhouse professionals.

Reading and writing professional reports, for both internal as well as external customers.

Building and implementing knowledge of growing processes within and throughout the company.

### Who are you?

To be able to perform this function successfully, you recognize yourself in the following skills:

- You have HBO or higher working and thinking level in a relevant field of education
- You have experience with vertical farms and/or a strong background in plant biology
- Oral and written fluency in English. Dutch and/or another language is welcome but not mandatory.
- You take initiative, are persuasive and have strong communication skills
- You are a team player that can work largely independent

### What do we offer?

We offer you an independent and varied position within a dynamic, flexible organization, where there is a good informal working atmosphere. There is room for your personal development and the employment conditions are in accordance with the position

If you recognize yourself in the above, please send your application to:
